BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

**As rescanning documents *will not* correct images,
please do not report the images to the
Image Problem Mailbox.**

CLAIMS

Replace Claims 1 to 5 with Claims 6 to 17.

5 What is claimed:

1 ~~8.~~ A host computer which receives information from outside, contains a browser which renders this information onto a virtual display in its memory, whereby a software program reduces the color depth of the rendered
10 virtual display, compresses this reduced virtual display, which is sent to a remote device capable of receiving, decompressing, storing into memory and displaying it to a user.

2 ~~7.~~ A host computer which receives information from outside, contains a browser which renders this information onto a virtual display in its memory
15 with a reduced color depth, compresses this reduced virtual display, and sends it to a remote device which is capable of receiving, decompressing, storing into memory and displaying it to a user.

20 3 ~~8.~~ A device as claimed in Claims ~~6~~¹ or ~~7~~² such that the user can click on the image of a web page and a message is sent to the host computer whereby the browser inputs the click into the web page, which causes another web page to be received from outside, rendered by the browser, the color depth reduced and the image compressed and resent to the device for displaying
25 it to a user.

4 ~~8.~~ A device as claimed in Claims ~~6~~¹ or ~~7~~² such that scrolling of the image for viewing by the user is done at the device.

5 ~~5~~ 10. A device as claimed in Claims ~~6~~¹ or ~~7~~² such that the user can click on the image of a web page displayed on the device and a message is sent to the host computer which contains information of the click location relative to the web page, and not only information of the click location relative to the display of the device.

10 ~~6~~ 11. A device as claimed in Claims ~~6~~¹ or ~~7~~² such that the user can click on the image of a web page displayed on the device and a message is sent to the host computer which contains information of the click location relative to the display and also the location of the display relative to the web page, to allow the host computer to deduce exactly where the click location occurred relative to the web page.

15 ~~7~~ 12. A device as claimed in Claims ~~6~~¹ or ~~7~~² such that the user can click on the image of a web page displayed on the device and a message is sent to the host computer which contains information of the click location relative to the display, whereby the host computer is already provided with the display location relative to the web page, as previous scrolling activity sent a message to the host computer informing of the display location relative to the web page, to allow the host computer to deduce exactly where the click location occurred relative to the web page.

25 ~~8~~ 13. A device as claimed in Claims ~~6~~¹ or ~~7~~² such that it allows the user to input text and numbers, which can then be sent to the host computer, which then sends a refreshed image back to the device.

~~9~~ 14. A device as claimed in Claims ~~6~~¹ or ~~7~~² such that the host computer receives information compressed in a format which is decompressed and rendered

into memory, reduced in color depth, recompressed and sent in a different format to the remote device for displaying it to a user.

5 ~~1015.~~ A device as claimed in Claims ~~6~~¹ or ~~7~~² such that the host computer receives information from the outside and only information specific to the application is hard coded on the device, or only sent once to the remote device, and only information that is received from the outside is rendered into memory, reduced in color depth, compressed and sent to the remote device for displaying it to a user.

10 ~~1115.~~ A device as claimed in Claims ~~6~~¹ or ~~7~~² such that information that is compressed and sent to the remote device is sent in blocks, whereby each block contains an identifier to identify the location of blocks relative to the web page.

15 ~~1215.~~ A device as claimed in Claims ~~6~~¹ or ~~7~~² such that information that is compressed and sent to the remote device is sent in blocks, whereby blocks are sent in order of priority which depends on the location of the display of the remote device with respect to the web page.
